

## Cooler Cooler

Cooler —a super advanced innovative triple layer fabric that ensures optimum temperatures are consistently maintained.

1. The outer layer is made from a tight knit hard wearing and virtually snag-proof blend of wool and polyacryl which offers warmth, wind resistance and durability.
2. The middle layer is a Therma-Dry filler layer which is the ultimate in thermal insulation and has superb wicking abilities.
3. The inner layer is designed for warmth and comfort even for sensitive skins. It wicks moisture away quickly towards the outer layer ensuring the horse does not become chilled.

The use of Cooler rugs are endless —smart enough for shows, perfectly suited for travelling, as a warm cosy stable rug and totally practical for every day use.

The innovative design of the Cooler fabric ensures excellent shape retention properties which will help prolong the life of your rug.
